

Engineered Stacks

Schebler
CHIMNEY SYSTEMS

*Taking value to
the highest levels*

Engineered to stack up.

**Schebler engineered stacks are made for Big Ideas
– bringing time, cost, safety and satisfaction value
to your high-level projects.**

Because each of your projects is unique, we're ready to bring fully customized venting capabilities, sizes, materials and fabrication skill to **design-build firms, mechanical and structural engineers, and industrial contractors.**

Schebler engineering and manufacturing specialists provide comprehensive engineering from start to finish – including **design, sizing, load calculations, fabrication and installation.** Or we can provide your engineering staff with skilled backup and consulting services, including draft calculations, CAD support, 3D modeling and mechanical specifications to reduce internal workloads and ensure accurate design.

**For the total project or time-eating details –
we're on it.**

Taking value to the highest levels

Depend on Schebler's knowledge and experience.

- Single-wall, double-wall or multiple-flue stacks
- Free-standing or secured structures; one-piece or sectional
- Support structures that eliminate need for guy wires
- Metals including steel, Cor-Ten® steel, stainless steel, aluminum or choice alloys
- Steel breeching and ductwork
- Chimney liner updates and repairs
- Complete engineering specifications/ 3D CAD support
- Industry's fastest turnaround; guaranteed on-time

High strength. Low risk.

Schebler stacks are engineered and rated to **withstand wind and seismic loading** without being braced to another structure. Stable and high-profile, they vent fumes at high elevation, away from other buildings and environments.

Strict fabrication quality control meets American Welding Society codes and ASME STS-1-2006 and SMACNA guidelines for steel stack design and construction. Welders are AWS and ASME Pressure Vessel Code certified.

We handle tricky venting routes, tight schedules and aesthetically demanding projects. **So you can, too.**

From design to delivery ...

Schebler chimney stacks are fabricated in our 170,000 sq. ft. facility and shipped to your site in the largest, most complete sections feasible – minimizing field welding and construction time/cost. You'll enjoy smooth installation of your stack – and some of the best shipping rates in the industry.

Check out our work on a skyline near you, including projects for Yankee Stadium, St. Jude's Hospital, Disney Corporation, John Deere, Los Alamos Labs and many more.

... elevate your customers' satisfaction.

Contact us today for more information. We'd welcome the opportunity to provide you with a single resource for engineered stacks. Rely on us for one-of-a-kind solutions for you and your customers.

*spec*Schebler

From UL-listed double wall venting to free-standing stacks, Schebler offers the single-source professional support that makes your job easier. *spec*Schebler to:

- **Size it** • **Select it** • **Draw it** • **Route it** •
- **Fabricate it** • **Guarantee it** •
